

CORPORATE TRAINING

The Corporate Training focuses on the corporate personals, especially the researchers, and management personals. The researchers provide strategic evolutionary advantage amidst the industry. The management makes sure that the industrial advantage is monetized and maximized. We at Videaim IP, believe in "KNOWLEDGE IS EMPOWERED BY SPREADING". We organize training programs to teach the "INVENTOR" about knowhow of IP tools so that they can indulge themselves in building and nurturing their own intellectual property portfolio. We provide corporate training to Research and Development departments of corporate and management indulged in licensing and agreements for the intellectual property.

Basic Training: The researchers are taught to identify IP and categorize IP, read patent documents, analyze claims, patent filing procedures, and important deadlines. The object of the training is to make researchers IP sufficient so that researchers could identify any new IP asset that is created and analyze its benefits, and communicate to the professionals for protectable under IP. The management are taught about technology licensing, basic concept of IP, the commonly used jargons, filing procedures and requirements of IP, and basics of contracts.

Advanced Training: Patent Drafting, Patent Analysis and identify gap in the technology (problem-solution). The object of the training is to make Research and Development departments, self sufficient in handling patent.
